Hi, I'm Tom Walsh. I co-wrote and later directed, *Dwegons & Leprechauns* to take film audiences on a magical adventure to worlds never seen before, filled with fun creatures that instead of *scaring* kids are lovable and caring of people. Colorful worlds make people feel good and in *Dwegonland* you can get lost in a universe of fantastical colors. It makes you happy and provides a nice break from our *not-so-happy* real world. However; Picture is only one part. To bring a magical world to Life, you need the right Music! Stephen Melillo wrote a *wonder-filled* score that transports you and makes you feel great inside. He took my vision of this world and gave it even greater dimension. You will feel energized and magical when you sit back and listen to this *wonderful* fun Music Score! Thanks so much, Steve!

*Dwegons & Leprechauns* was composed and orchestrated averaging 6.5 minutes per day. After scoring 106 minutes, it was discovered that the print was in the wrong frame rate. The entire score needed to be redone. Cues like *Dvargon Hell & The Battle for Dwegonland*, recorded as one piece and having 88 critical hit points needed new math and Music. I got to score Tom's film *twice*, and... **IT WAS FUN!** When we got to Reel 6 the second time, Tom called and said, **"I just want you to write me a concert! You have total freedom."**

These are incredible words coming from any Director-Producer, and in this case, a *Fightin'-Irish Lad* who invested so much of himself across the many years!

In addition to my kids, this Music is dedicated to *Tom Walsh*, whose vision, inspiration and fun direction led to a Musical portrayal of his own special, Good-hearted, kid-friendly, color-filled world. Writing the Music, with my kids often watching, I knew Tom had made something *from* and *to* the Hearts of all Children... of all ages. I hope you will enjoy this Musical version of the *Dwegons & Leprechauns* Adventure. Thanks for listening again and again. Godspeed! Stephen Melillo
